

HEALTHY LIVING

EXERCISE 4:

PESTS TRUE OR FALSE

GOAL

Dispel myths about pests and describe most effective pest control strategies for cockroaches, mice and bed bugs.

DIRECTIONS

Circle true or false next to the following statements:

- | | | |
|---|-------------|--------------|
| 1. The feces (poop) and urine from cockroaches and mice can trigger asthma attacks in some people. | TRUE | FALSE |
| 2. A mouse needs a hole at least the size of a quarter to squeeze into a building. | TRUE | FALSE |
| 3. Cockroach feces look like mice feces. | TRUE | FALSE |
| 4. I know my property manager is on top of the pest problem because I see a pest control company coming to spray my home every month or so. | TRUE | FALSE |
| 5. Baits and gels are effective pesticides to control cockroaches. | TRUE | FALSE |
| 6. Asthma triggers are eliminated once cockroaches and mice are removed. | TRUE | FALSE |
| 7. Cigarette smoke can make cockroach baits less effective. | TRUE | FALSE |
| 8. A good way to solve a mouse problem is to trap them. | TRUE | FALSE |
| 9. Boric acid works well to stop cockroaches and mice. | TRUE | FALSE |
| 10. Bed bugs are found only in beds. | TRUE | FALSE |
| 11. A tenant can take care of a bed bug problem on their own. | TRUE | FALSE |
| 12. One visit by a pest professional to solve a bed bug or other pest problem is usually enough. | TRUE | FALSE |
