abose@enterprisecommunity.com

As the vice president of software engineering, Ashis Bose manages all software teams that develop and support business systems and external web portals for the entire Enterprise family of companies. He provides technological leadership for platforms that include cloud technologies like Salesforce.com and Amazon Web Services, business intelligence technologies like QlikView and SQLServer Analytics, custom solutions in .Net and the “MEAN” technology stack, and integration technologies like Boomi and DBAmp. The portfolio of Enterprise solutions include marketing, sales automation, customer relationship management (CRM), financial modeling and reporting, financial and real estate asset management, mapping/GIS, and business intelligence.

Ashis is a senior technology executive with over 20 years of industry experience. Prior to joining Enterprise in 2010, he was the software development director at Vertis Communications, a Fortune 1000 marketing company, where he led the delivery of products for CRM, data warehousing, business intelligence and sales automation. Previously, he held management and technical positions at Unisys Corporation, where he led the delivery of financial services software to global Fortune 500 financial customers. Prior to Unisys, Ashis was with QVC, a leading television and internet-based retailer, where he provided technical leadership of the original implementation of QVC’s internet division, supporting millions of customers.

Ashis holds a bachelor’s degree in electrical engineering from the Indian Institute of Technology and a master’s degree in information systems from the Pennsylvania State University. He holds certifications as a PMP, Agile SCRUM Master, OMG UML Professional and Six Sigma Green Belt.
