Park Heights Place is a development of 83 affordable elderly apartments in the Park Heights neighborhood.

The four-story, T-shaped building offers one-bedroom apartments containing approximately 600 square feet, designed for senior citizens. Each apartment provides such standard features as central heat and air conditioning, a fully equipped kitchen, bedroom, bathroom and living room. The development also features a large community room, TV room, laundry facility, lounge, a wellness clinic and two outdoor patios for residents to enjoy.

Park Heights Place has brought new life to the surrounding neighborhood, as well as providing badly needed affordable elderly housing. It was built on land formerly occupied by a long term vacant Holiday Inn. Fifty-eight percent of the apartments are targeted to residents earning 40 percent or less of the area median income.
