Faith-Based Development Initiative
Annual Summit
November 10, 2022

Description
This year’s summit theme is “Faith-Based Community Development: A National Movement Getting Deals Done.” The agenda will include panel discussions on how faith-based affordable housing and community development is increasingly taking place across the U.S., how houses of worship are building community wealth and what it takes to successfully move through the development process as a house of worship. Discussions will focus on how houses of worship and their partners are navigating a myriad of issues to activate underutilized land owned by houses of worship for community benefit.
