WHAT DEFINES HEALTH & WELL-BEING?

- Access and Affordability of Health Care
- Health Status

THINK ABOUT WHERE YOU LIVE

- Where do you live?
- What stands out to you about this map?
- How might redlining play a role in shaping the experiences of the people in your community?
- In your experience, what other factors might be contributing to the outcomes observed where you live?
- What steps can we make together to improve outcomes for all communities?

Health & Well-Being in Atlanta

Percentile Score: Represents each census tract’s state percentile rank for the set of indicators described below. A tract with a score of 99 means that the tract is in the 99th percentile—99% of the state has higher scores and 1% has lower scores.

Health & Well-Being percentile scores include:
- Percentage of Adults Reporting to Have a Personal Doctor or Health Care Provider
- Percentage of Adults Reporting to Have Fair or Poor Health Status in the last 30 days
- Percentage of Adults Reporting a Physical Checkup in the Past Year in this Tract
- Percentage of Adults Reporting to Have Diabetes
- Percentage of Adults Reporting to Have Chronic Obstructive Pulmonary Disease (COPD)
- Percentage of Adults Reporting to Be Obese
- Percentage of all People Without Health Insurance

Self-reported health status data are sourced from the CDC Behavioral Risk Factor Surveillance System.
