

# AHSC DISTRICT PROFILE

The Affordable Housing and Sustainable Communities Program

## Assemblymember Miguel Santiago (AD-53)

**The AHSC program is a critical investment in California's health and wellbeing.** Established in 2014, the AHSC program invests in affordable homes and transit infrastructure developments – primarily in disadvantaged communities – that improve economic well-being and physical health for underserved Californians while also reducing greenhouse gas (GHGs) emissions. The AHSC program is central to achieving the statewide goals established by AB 32 and SB 375.

**AHSC is a critical investment toward preserving and developing affordable housing for lower income households.** By placing affordable housing near quality transit, AHSC is also an investment toward reducing air pollution, improving public health, improving connectivity and accessibility to jobs, and increasing transit ridership.

The AHSC program is administered by the Strategic Growth Council (SGC), and is funded by the Greenhouse Gas Reduction Fund, which collects proceeds from cap-and-trade auctions.
