Additional resources that might be helpful:

[Grounded Solutions E-Learning Series](#). We offer a monthly e-learning series that covers the nuts and bolts of creating and sustaining permanently affordable housing. Some sessions are meant more for individuals who are new to the topic and some are more advanced but everyone is welcome!

[Intersections 2017](#). Our national conference will be in Oakland this October. We don't have much information on the conference website right now—we're still collecting session and speaker proposals through our open call—but we'll post the full agenda in May.

[Online Resources](#). This page is a great first stop for CLT related questions. I especially encourage folks to look at the CLT technical manual for specific questions around equitable taxation, appraisals and financing.
